

PAYONE

Webhook Processing

Summary	Manual Test Steps	
PAYONE - Apple Pay - Site Preferences Behavior - Use Shipping Method From Checkout Form = Yes	1	Action Ensure the payment method DWAPPLEPAY is enabled and configured with PAYONECOMMERCE
		Data
		Expected Result Payment method DWAPPLEPAY is enabled and configured correctly.
	2	Action Verify that Apple Pay is available in the test environment using a sandbox tester account
		Data
		Expected Result Apple Pay is available for testing with a sandbox tester account.
	3	Action Check that PAYONE credentials are configured in custom preferences
		Data
		Expected Result PAYONE credentials are properly configured.
	4	Action Ensure Apple Pay is configured in the SFCC BM Apple Pay module - PAYONE Apple Pay - Use Billing Address From Checkout Form: No - PAYONE Apple Pay - Use Shipping Address From Checkout Form: No - PAYONE Apple Pay - Use Shipping Method From Checkout Form: Yes
		Data
		Expected Result Apple Pay is configured in the SFCC BM Apple Pay module.

Summary	Manual Test Steps
	- PAYONE Apple Pay - Use Billing Address From Checkout Form: No - PAYONE Apple Pay - Use Shipping Address From Checkout Form: No - PAYONE Apple Pay - Use Shipping Method From Checkout Form: Yes
	•
	5 Action Enable the preference "Use Shipping Method From Checkout Form = Yes"
	Data
	Expected Result Preference is enabled.
	6 Action Add a product to the cart and proceed to checkout
	Data
	Expected Result Product is added to the cart and user is on the checkout page.
	7 Action Navigate to the payment step
	Data
	Expected Result User is on the payment step of the checkout process.
	8 Action Select Apple Pay as the payment method
	Data
	Expected Result The Apple Pay interface is displayed.

Summary	Manual Test Steps	
		9 Action Verify that the Apple Pay interface does not display the shipping method
		Data
		Expected Result The Apple Pay interface does not display the shipping method.
		10 Action Complete the order using Apple Pay
		Data
		Expected Result The order is created using the shipping method from the checkout form.
PAYONE - Apple Pay - Site Preferences Behavior - Use Billing Address From Checkout Form = Yes	1	Action Ensure the payment method DWAPPLEPAY is enabled and configured with PAYONECOMMERCE as the Payment Processor.
		Data
		Expected Result Payment method DWAPPLEPAY is enabled and configured correctly.
	2	Action Verify that Apple Pay is available in the test environment using a sandbox tester account on an Apple device.
		Data
		Expected Result Apple Pay is available and functional in the test environment.
	3	Action Ensure PAYONE credentials are properly configured in custom preferences.

Summary	Manual Test Steps	
		Data Expected Result Billing address is from the Apple Pay interface, and the shipping address is from the checkout form.
PAYONE - Apple Pay - Site Preferences Behavior - Use Shipping and Billing Data from Checkout Form	1	Action Ensure that the payment method DWAPPLEPAY is enabled and configured with PAYONECOMMERCE as the Payment Processor.
		Data
		Expected Result Payment method DWAPPLEPAY is enabled and configured correctly.
	2	Action Verify that Apple Pay is available in the test environment using a sandbox tester account on an Apple device.
		Data
		Expected Result Apple Pay is available and functional in the test environment.
	3	Action Ensure PAYONE credentials are properly configured in custom preferences.
		Data
		Expected Result PAYONE credentials are correctly configured.
	4	Action Verify that Apple Pay is configured in the SFCC BM Apple Pay module.
		Data
		Expected Result

Summary	Manual Test Steps
	Apple Pay is configured in the SFCC BM Apple Pay module.
	5 Action Enable all site preferences related to using shipping and billing data from the checkout form.
	Data
	Expected Result All relevant site preferences are enabled.
	6 Action Go to the storefront and add a product to the cart.
	Data
	Expected Result Product is successfully added to the cart.
	7 Action Proceed to checkout.
	Data
	Expected Result User is navigated to the checkout page.
	8 Action Navigate to the payment step in the checkout process.
	Data
	Expected Result User is on the payment step of the checkout process.
	9 Action Modify the billing address in the checkout form.
	Data
	Expected Result The billing address is updated in the order.

Summary	Manual Test Steps
	10 Action Select Apple Pay as the payment method. Data Expected Result Apple Pay is selected as the payment method. 11 Action Verify that the Apple Pay interface does not display the billing address, shipping address, or shipping method. Data Expected Result The Apple Pay interface does not display the billing address, shipping address, or shipping method. 12 Action Complete the order using Apple Pay. Data Expected Result The order is created using the checkout form's shipping method, shipping address, and billing address. 13 Action Check the PAYONE Portal to confirm that both billing and shipping addresses come from the checkout form. Data Expected Result Both billing and shipping addresses in the PAYONE Portal match those from the checkout form.
PAYONE - Apple Pay - Cancel Flow	1 Action Ensure the payment method DWAPPLEPAY is enabled and configured with PAYONECOMMERCE as the Payment Processor.

Summary	Manual Test Steps	
		Expected Result Apple Pay interface is displayed.
	9	Action Complete the Apple Pay payment flow.
		Data
		Expected Result Payment is processed successfully.
	10	Action Verify that the confirmation page is displayed.
		Data
		Expected Result Confirmation page is displayed.
	11	Action Locate and open the newly created order in Business Manager.
		Data
		Expected Result Order is located and opened successfully.
	12	Action In the General tab, click on Shipment.
		Data
		Expected Result Shipment details are displayed.
	13	Action Verify that the shipping method matches the one selected in the Apple Pay interface.
		Data
		Expected Result

Summary	Manual Test Steps	
		Shipping method matches the one from the Apple Pay interface.
	14	Action
		Verify that the shipping address matches the one from the Apple Pay interface.
		Data
		Expected Result
		Shipping address matches the one from the Apple Pay interface.
	15	Action
		Go back to the General tab and click on Payment.
		Data
		Expected Result
		Payment details are displayed.
	16	Action
		Verify that the Payment Method is DWAPPLEPAY.
		Data
		Expected Result
		Payment Method is DWAPPLEPAY.
	17	Action
		Verify that PAYONE Commerce Case ID, Checkout ID, Checkout Reference, Payment Execution ID, and Payment Status are stored.
		Data
		Expected Result
		All PAYONE details are stored correctly.
	18	Action
		Verify that the billing address matches the one from the Apple Pay interface.
		Data

Summary	Manual Test Steps
	Expected Result Billing address matches the one from the Apple Pay interface.
	19 Action Open Checkouts in the PAYONE Portal.
	Data
	Expected Result PAYONE Portal Checkouts are displayed.
	20 Action Verify that the newest checkout entries appear at the top of the table.
	Data
	Expected Result Newest checkout entries are at the top.
	21 Action Match the list using the checkout merchant reference with the PAYONE Checkout Reference in BM.
	Data
	Expected Result List matches with the PAYONE Checkout Reference.
	22 Action Locate the transaction for the order just placed.
	Data
	Expected Result Transaction is located successfully.
	23 Action Verify that it displays the Apple Pay logo.
	Data

Summary	Manual Test Steps	
		Expected Result Apple Pay logo is displayed.
	24	Action Verify that the status reflects successful authorization.
		Data
		Expected Result Status shows successful authorization.
	25	Action Verify that the billing address matches the one from the Apple Pay interface.
		Data
		Expected Result Billing address matches the one from the Apple Pay interface.
	26	Action Verify that the shipping address matches the one from the Apple Pay interface.
		Data
		Expected Result Shipping address matches the one from the Apple Pay interface.
PAYONE - Apple Pay - “Next” Button Behavior - Button reappears when editing the shipping address	1	Action Ensure the payment method DWAPPLEPAY is enabled and configured with PAYONECOMMERCE.
		Data
		Expected Result Payment method DWAPPLEPAY is enabled and configured correctly.
	2	Action

Summary	Manual Test Steps
	Verify that Apple Pay is available in the test environment using a sandbox tester account on an Apple device.
	Data
	Expected Result Apple Pay is available and functional in the test environment.
	3 Action Ensure PAYONE credentials are properly configured in custom preferences.
	Data
	Expected Result PAYONE credentials are correctly configured.
	4 Action Verify that Apple Pay is configured in the SFCC BM Apple Pay module.
	Data
	Expected Result Apple Pay is configured in the SFCC BM Apple Pay module.
	5 Action Open the storefront on a compatible Apple device and browser.
	Data
	Expected Result Storefront is accessible on a compatible device and browser.
	6 Action Add a product to the cart.
	Data
	Expected Result Product is successfully added to the cart.

Summary	Manual Test Steps
	7 Action Proceed to the checkout page. Data Expected Result Checkout page is displayed.
	8 Action Select Apple Pay as the payment method. Data Expected Result Apple Pay is selected as the payment method.
	9 Action Edit the shipping address. Data Expected Result Shipping address is editable.
	10 Action Observe the behavior of the "Next" button. Data Expected Result The Next button becomes visible again so you can proceed to the payment options.
	11 Action Verify the checkout flow behaves normally after editing the shipping address. Data Expected Result The checkout flow behaves normally.

Summary	Manual Test Steps		
PAYONE - Apple Pay - “Next” Button Behavior - Button reappears when switching payment method	1	Action	Ensure the payment method DWAPPLEPAY is enabled and configured with PAYONECOMMERCE.
		Data	
		Expected Result	Payment method DWAPPLEPAY is enabled and configured correctly.
	2	Action	Verify that Apple Pay is available in the test environment using a sandbox tester account on an Apple device.
		Data	
		Expected Result	Apple Pay is available and functional in the test environment.
	3	Action	Check that PAYONE credentials are properly configured in custom preferences.
		Data	
		Expected Result	PAYONE credentials are correctly configured.
	4	Action	Ensure Apple Pay is configured in the SFCC BM Apple Pay module.
		Data	
		Expected Result	Apple Pay is configured in the SFCC BM Apple Pay module.
	5	Action	Open the storefront on a compatible Apple device and browser.
		Data	
		Expected Result	

Summary	Manual Test Steps	
		Storefront is accessible on a compatible device and browser.
	6	Action Add a product to the cart.
		Data
		Expected Result Product is successfully added to the cart.
	7	Action Proceed to the checkout page.
		Data
		Expected Result Checkout page is displayed.
	8	Action Select Apple Pay as the payment method.
		Data
		Expected Result Apple Pay is selected as the payment method.
	9	Action Verify that the Next button is hidden when Apple Pay is selected.
		Data
		Expected Result The Next button is hidden.
	10	Action Switch to Card or another payment method.
		Data
		Expected Result Payment method is switched to Card or another option.

Summary	Manual Test Steps		
	11	Action	Verify that the Next button becomes visible again.
		Data	
		Expected Result	The Next button is visible.
	12	Action	Ensure the checkout flow behaves normally after switching payment methods.
		Data	
		Expected Result	Checkout flow proceeds normally.
PAYONE - Apple Pay - “Next” Button Behavior - Button hides when Apple Pay is selected	1	Action	Ensure that the payment method DWAPPLEPAY is enabled and configured with PAYONECOMMERCE as the Payment Processor.
		Data	
		Expected Result	Payment method DWAPPLEPAY is enabled and configured correctly.
	2	Action	Verify that Apple Pay is available in the test environment using a sandbox tester account on an Apple device.
		Data	
		Expected Result	Apple Pay is available and functional in the test environment.
	3	Action	Ensure PAYONE credentials are properly configured in custom preferences.
		Data	

Summary	Manual Test Steps	
		Expected Result PAYONE credentials are configured correctly.
	4	Action Verify that Apple Pay is configured in the SFCC BM Apple Pay module.
		Data
		Expected Result Apple Pay is configured in the SFCC BM Apple Pay module.
	5	Action Add a product to the cart in the storefront.
		Data
		Expected Result Product is successfully added to the cart.
	6	Action Proceed to checkout.
		Data
		Expected Result User is navigated to the checkout page.
	7	Action Navigate to the payment step.
		Data
		Expected Result User is on the payment step of the checkout process.
	8	Action Select “Payone Commerce Apple Pay” as the payment method.
		Data
		Expected Result

Summary	Manual Test Steps	
		"Next" button becomes hidden.
	9	Action Verify that the "Next" button is hidden when Apple Pay is selected.
		Data
		Expected Result The "Next" button is not visible.
	10	Action Select a different payment method.
		Data
		Expected Result "Next" button reappears.
	11	Action Verify that the "Next" button reappears when another payment method is selected.
		Data
		Expected Result The "Next" button is visible again.
PAYONE - Apple Pay - Conditional Visibility of Apple Pay II	1	Action Ensure that the payment method DWAPPLEPAY is enabled and configured with PAYONECOMMERCE as the Payment Processor.
		Data
		Expected Result Payment method DWAPPLEPAY is enabled and configured correctly.
	2	Action Verify that Apple Pay is available in the test environment using a sandbox tester account on an Apple device.

Summary	Manual Test Steps	
		Data
		Expected Result Apple Pay is available and functional in the test environment.
	3	Action Check that PAYONE credentials are properly configured in custom preferences.
		Data
		Expected Result PAYONE credentials are correctly configured.
	4	Action Ensure that Apple Pay is configured in the SFCC BM Apple Pay module.
		Data
		Expected Result Apple Pay is configured in the SFCC BM Apple Pay module.
	5	Action Open Safari on macOS or use an iPhone/iPad to access the storefront.
		Data
		Expected Result Storefront is accessible on an Apple device.
	6	Action Add a product to the cart.
		Data
		Expected Result Product is successfully added to the cart.
	7	Action Proceed to checkout.

Summary	Manual Test Steps	
		Data
		Expected Result Navigated to the checkout page.
	8	Action Navigate to the payment step.
		Data
		Expected Result Payment step is displayed.
	9	Action Check the available payment methods.
		Data
		Expected Result "Payone Commerce Apple Pay" appears in the list of payment methods.
	10	Action Select "Payone Commerce Apple Pay" as the payment method.
		Data
		Expected Result "Payone Commerce Apple Pay" is selected successfully.
	11	Action Verify that the default Next button is hidden when Apple Pay is selected.
		Data
		Expected Result The Next button is hidden.
	12	Action Select another payment method.

Summary	Manual Test Steps																		
	<table> <tr> <td></td><td>Data</td></tr> <tr> <td></td><td>Expected Result Another payment method is selected.</td></tr> <tr> <td>13</td><td> Action Verify that the Next button reappears when another payment method is selected. </td></tr> <tr> <td></td><td>Data</td></tr> <tr> <td></td><td>Expected Result The Next button reappears.</td></tr> </table>		Data		Expected Result Another payment method is selected.	13	Action Verify that the Next button reappears when another payment method is selected.
