		Data
		Expected Result PAYONE CSC extension opens.
	7	Action Review the PAYONE transaction summary and status
		Data
		Expected Result PAYONE summary data is shown correctly.
	8	Action Select an actionable row for item-level operations
		Data
		Expected Result The row is highlighted for action.
	9	Action Enter a quantity of `0` for the selected row
		Data
		Expected Result Invalid quantity is rejected.
	10	Action Verify that no PAYONE action is executed for the quantity `0`
		Data
		Expected Result

Summary	Manual Test Steps
	No action is executed.
	11 Action Enter a decimal quantity such as `1.5` for the selected row
	Data
	Expected Result Invalid quantity is rejected.
	12 Action Verify that no PAYONE action is executed for the decimal quantity
	Data
	Expected Result No action is executed.
	13 Action Enter a quantity greater than the available capturable or refundable quantity
	Data
	Expected Result Invalid quantity is rejected.
	14 Action Verify that no PAYONE action is executed for the excessive quantity
	Data
	Expected Result No action is executed.
	15 Action Attempt to perform an item-level capture with a valid quantity
	Data
	Expected Result Capture operation is successful for valid quantity.

Summary	Manual Test Steps
	16 Action Attempt to perform an item-level refund with a valid quantity Data Expected Result Refund operation is successful for valid quantity.
	17 Action Attempt to perform an order-level capture with a valid amount Data Expected Result Order-level capture is successful and item-level actions are disabled.
	18 Action Attempt to perform an order-level refund with a valid amount Data Expected Result Order-level refund is successful and item-level actions are disabled.
	19 Action Attempt to cancel the authorization with an invalid reason Data Expected Result Invalid cancel reason is rejected.
	20 Action Verify that no PAYONE action is executed for the invalid cancel reason Data Expected Result No action is executed.

Summary	Manual Test Steps		
	21	Action	Verify that PAYONE payment initiation is not possible from the Customer Service Center
		Data	
		Expected Result	PAYONE payment initiation is prevented.
		Action	Check that orders with order-level discounts use order-level amount operations
		Data	
		Expected Result	Order-level operations are used instead of item-level operations.
PAYONE - Customer Service Center - Authorization Cancel Tests - Item Action Without Selection	1	Action	Log in to Salesforce Commerce Cloud Business Manager with appropriate credentials.
		Data	
		Expected Result	Successfully logged in to the Business Manager.
	2	Action	Navigate to the Customer Service Center.
		Data	
		Expected Result	Customer Service Center is displayed.
	3	Action	Search for an authorized PAYONE order that has not been captured, refunded, or cancelled.
		Data	
		Expected Result	

Summary	Manual Test Steps
	The order is found and displayed.
	4 Action Open the order details page for the selected PAYONE order.
	Data
	Expected Result Order details page is displayed.
	5 Action Click the `More` button at the top right of the order details page.
	Data
	Expected Result A dropdown menu is displayed.
	6 Action Select the `PAYONE` option from the dropdown menu.
	Data
	Expected Result PAYONE CSC extension opens.
	7 Action Verify that PAYONE summary data is displayed correctly for the order.
	Data
	Expected Result PAYONE summary data is shown correctly.
	8 Action Ensure that item-level capture or refund options are available for the order.
	Data
	Expected Result

Summary	Manual Test Steps
	Item-level capture or refund options are available.
	9 Action Without selecting any item row, click ` Capture Selected Items ` . Data Expected Result The action is not submitted.
	10 Action Observe the validation message displayed by the extension. Data Expected Result A validation message asks the merchant to select at least one item.
	11 Action Without selecting any item row, click ` Refund Selected Items ` . Data Expected Result The action is not submitted.
	12 Action Observe the validation message displayed by the extension. Data Expected Result A validation message asks the merchant to select at least one item.
	13 Action Verify that non-PAYONE orders do not expose unsupported post-order actions. Data Expected Result

Summary	Manual Test Steps
	Unsupported post-order actions are not exposed for non-PAYONE orders.
	14 Action Check that order-level capture and refund work for valid amounts. Data Expected Result Order-level capture and refund work correctly for valid amounts.
	15 Action Ensure that order-level capture and refund disable further item-level actions. Data Expected Result Further item-level actions are disabled after order-level operations.
	16 Action Attempt to perform an authorization cancel operation before capture/refund. Data Expected Result Authorization cancel works only before capture/refund.
	17 Action Provide an invalid cancellation reason and attempt to cancel authorization. Data Expected Result The invalid cancellation reason is rejected.
	18 Action Verify that orders with order-level discounts use order-level amount operations.

Summary	Manual Test Steps	
		Data
		Expected Result Order-level amount operations are used instead of item-level operations.
	19	Action Attempt to execute PAYONE actions with invalid quantities or amounts.
		Data
		Expected Result Invalid quantities and amounts are rejected before execution.
	20	Action Ensure that PAYONE payment initiation is not possible from the Customer Service Center.
		Data
PAYONE - Customer Service Center - Authorization Cancel Tests - Order-Level Discount Behavior		Expected Result PAYONE payment initiation is not possible from the Customer Service Center.
	1	Action Log in to Salesforce Commerce Cloud Business Manager.
		Data
		Expected Result Successfully logged in to the Business Manager.
	2	Action Navigate to the Customer Service Center.
		Data
		Expected Result Customer Service Center is displayed.

Summary	Manual Test Steps
	3 Action Search for an authorized PAYONE order that has not been captured, refunded, or cancelled. Data Expected Result The order is found and displayed.
	4 Action Open the order details page for the selected PAYONE order. Data Expected Result Order details page is displayed.
	5 Action Click the `More` button at the top right of the order details page. Data Expected Result A dropdown menu is displayed.
	6 Action Select the `PAYONE` option from the dropdown menu. Data Expected Result PAYONE CSC extension opens.
	7 Action Review the PAYONE transaction summary and status display. Data Expected Result PAYONE transaction summary and status are displayed correctly.
	8 Action

Summary	Manual Test Steps
	Verify that non-PAYONE and checkout-only PAYONE orders do not expose unsupported post-order actions.
	Data
	Expected Result Unsupported post-order actions are not available for non-PAYONE and checkout-only PAYONE orders.
	9 Action Open an order that contains an order-level discount or coupon.
	Data
	Expected Result Discounted PAYONE order is displayed.
	10 Action Click the `More` button at the top right of the order details page and select `PAYONE`.
	Data
	Expected Result PAYONE CSC extension opens for the discounted order.
	11 Action Review the `Item Level Operations` tab.
	Data
	Expected Result Item-level operations are displayed.
	12 Action Review the `Order Level Operations` tab.
	Data
	Expected Result Order-level operations are displayed.

Summary	Manual Test Steps
	13 Action Verify item-level availability before performing any order-level action. Data Expected Result Item-level operations are disabled due to the order-level discount.
	14 Action Check for the presence of a `DISCOUNT` row in the item table. Data Expected Result `DISCOUNT` row is visible as informational data.
	15 Action Attempt to select the `DISCOUNT` row for capture or refund. Data Expected Result `DISCOUNT` row cannot be selected for capture or refund.
	16 Action Verify that item-level capture and refund are disabled because of the order-level discount. Data Expected Result Item-level operations are disabled with a message indicating the restriction.
	17 Action Perform capture or refund by order-level amount when the PAYONE state allows it. Data Expected Result

Summary	Manual Test Steps
	Order-level amount operations are available and can be executed.
	18 Action Complete the order-level action and verify the update of the PAYONE transaction status.
	Data
	Expected Result Order-level action completes successfully and PAYONE transaction status is updated.
	19 Action Attempt to perform an authorization cancel operation before capture/refund.
	Data
	Expected Result Authorization cancel requires a valid cancellation reason and works only before capture/refund.
	20 Action Enter invalid quantities, amounts, or cancel reasons and attempt PAYONE actions.
	Data
	Expected Result Invalid inputs are rejected before PAYONE action execution.
	21 Action Verify that PAYONE payment initiation is not possible from the Customer Service Center.
	Data
	Expected Result PAYONE payment initiation is not allowed from the Customer Service Center.

Summary	Manual Test Steps	
PAYONE - Customer Service Center - Authorization Cancel Tests - Cancel Is Not Available After Capture Or Refund	1	Action Log in to Salesforce Commerce Cloud Business Manager with appropriate credentials.
		Data
		Expected Result Successfully logged in to the Business Manager.
	2	Action Navigate to the Customer Service Center.
		Data
		Expected Result Customer Service Center is displayed.
	3	Action Search for an order that has a completed capture or refund.
		Data
		Expected Result Order with completed capture or refund is located.
	4	Action Open the order details page for the selected order.
		Data
		Expected Result Order details page is displayed.
	5	Action Click the `More` button at the top right of the order details page.
		Data
		Expected Result Dropdown menu is displayed.
	6	Action

	Expected Result Item-level actions are disabled.																																
16	Action Check for a message indicating that item-level actions are no longer available due to an order-level amount action.																																
	Data																																
	Expected Result The message is displayed as expected.																																
17	Action																																

Summary	Manual Test Steps	
		Attempt to perform an item-level action to confirm it is disabled.
		Data
		Expected Result The action is not allowed, confirming it is disabled.
	18	Action Verify that non-PAYONE and checkout-only PAYONE orders do not expose unsupported post-order actions.
		Data
		Expected Result Unsupported actions are not available for these orders.
	19	Action Attempt to initiate a PAYONE payment from the Customer Service Center.
		Data
		Expected Result PAYONE payment initiation is not possible.
PAYONE - Customer Service Center - Item-Level Refund - Order-Level Capture	1	Action Log in to Salesforce Commerce Cloud Business Manager with appropriate credentials.
		Data
		Expected Result Successfully logged in to the Business Manager.
	2	Action Navigate to the Customer Service Center section.
		Data
		Expected Result Customer Service Center is displayed.

Summary	Manual Test Steps
	3 Action Search for an authorized PAYONE order with a capturable amount. Data Expected Result The order details page for the selected PAYONE order is displayed.
	4 Action Click on the `More` button at the top right of the order details page. Data Expected Result A dropdown menu is displayed.
	5 Action Select the `PAYONE` option from the dropdown menu. Data Expected Result PAYONE CSC extension opens.
	6 Action Verify that PAYONE summary data is displayed correctly for the order. Data Expected Result PAYONE transaction summary and status are displayed accurately.
	7 Action Ensure that unsupported post-order actions are not exposed for non-PAYONE and checkout-only PAYONE orders. Data Expected Result Unsupported actions are not visible.

Summary	Manual Test Steps
	8 Action Go to the `Order Level Operations` tab within the PAYONE CSC extension. Data Expected Result Order Level Operations tab is displayed.
	9 Action Enter a valid capture amount that is lower than or equal to the displayed maximum capturable amount. Data Expected Result Valid capture amount is entered.
	10 Action Click the `Capture Amount` button. Data Expected Result Capture action is initiated.
	11 Action Verify the capture result in Salesforce Commerce Cloud. Data Expected Result Capture event is recorded in SFCC.
	12 Action Verify the capture result in PAYONE. Data Expected Result PAYONE shows a capture event for the submitted amount.

Summary	Manual Test Steps
	13 Action Check that the order-level captured and collected amounts are updated in the order details. Data Expected Result Order-level captured and collected amounts are updated.
	14 Action Reopen the PAYONE CSC extension. Data Expected Result PAYONE CSC extension is reopened.
	15 Action Return to the item-level tab within the PAYONE CSC extension. Data Expected Result Item-level tab is displayed.
	16 Action Verify that item-level actions are disabled for this order. Data Expected Result Item-level actions are disabled.
	17 Action Check for a message indicating that item-level actions are no longer available due to an order-level amount action. Data Expected Result Message is displayed indicating item-level actions are unavailable.

Summary	Manual Test Steps
	18 Action Attempt to perform an item-level capture or refund operation. Data Expected Result Operation is not allowed; item-level actions are disabled. 19 Action Verify that authorization cancel operation is only possible before capture/refund and requires a valid cancellation reason. Data Expected Result Authorization cancel is restricted as expected. 20 Action Ensure that PAYONE payment initiation is not possible from the Customer Service Center. Data Expected Result PAYONE payment initiation is not possible. 21 Action Attempt to enter invalid quantities, amounts, or cancel reasons and initiate a PAYONE action. Data Expected Result Invalid entries are rejected before PAYONE action execution.
PAYONE - Customer Service Center - Item-Level Refund - Full Item Refund	1 Action Log in to Salesforce Commerce Cloud Business Manager with appropriate credentials. Data Username and Password

Summary	Manual Test Steps	
		Expected Result Successfully logged into the Business Manager.
	2	Action Navigate to the Customer Service Center from the Business Manager dashboard.
		Data
		Expected Result Customer Service Center is displayed.
	3	Action Search for an order with item-level captured quantities and no order-level discount.
		Data Order ID
		Expected Result Order details are displayed.
	4	Action Click on the 'More' button at the top right of the CSC order details page.
		Data
		Expected Result A dropdown menu is displayed.
	5	Action Select the 'PAYONE' option from the dropdown menu.
		Data
		Expected Result PAYONE CSC extension opens.
	6	Action Review the PAYONE transaction summary and status display.

Summary	Manual Test Steps	
		Data
		Expected Result PAYONE summary data is shown correctly for the order.
	7	Action Verify that non-PAYONE and checkout-only PAYONE orders do not expose unsupported post-order actions.
		Data
		Expected Result Unsupported actions are not available for non-PAYONE and checkout-only PAYONE orders.
	8	Action Select all item rows for the order to initiate a full item refund.
		Data
		Expected Result All item rows are selected.
	9	Action Initiate a refund for all captured quantities.
		Data
		Expected Result Refund process is initiated for all selected items.
	10	Action Refresh or reopen the PAYONE CSC extension.
		Data
		Expected Result PAYONE CSC extension is refreshed or reopened.
	11	Action Verify that no further refund action is available when no refundable quantity remains.

Summary	Manual Test Steps	
		Data
		Expected Result No refund action is available.
	12	Action Check the PAYONE summary for updated refunded and collected amounts.
		Data
		Expected Result PAYONE summary shows updated amounts.
	13	Action Attempt to perform an item-level capture or refund after a full refund.
		Data
		Expected Result Item-level actions are not available.
	14	Action Verify that order-level capture and refund work for valid amounts.
		Data
		Expected Result Order-level actions are successful for valid amounts.
	15	Action Ensure that authorization cancel works only before capture/refund and requires a valid cancellation reason.
		Data
		Expected Result Authorization cancel is successful only with a valid reason and before capture/refund.
	16	Action

Summary	Manual Test Steps	
	2	Action Navigate to the Customer Service Center section in Business Manager.
		Data
		Expected Result Customer Service Center is displayed.
	3	Action Place an order using the Store Pay / Pay in Store payment method.
		Data
		Expected Result Order is successfully placed with Store Pay / Pay in Store.
	4	Action Locate the newly placed order in the Customer Service Center.
		Data
		Expected Result Order details are displayed.
	5	Action Open the order details page.
		Data
		Expected Result Order details page is opened.
	6	Action Click the `More` button at the top right of the screen.
		Data
		Expected Result More options are displayed.
	7	Action

Summary	Manual Test Steps
	Select `PAYONE` from the dropdown menu.
	Data
	Expected Result PAYONE extension interface is displayed.
	8 Action Verify the visibility of the PAYONE CSC extension. Data Expected Result PAYONE CSC extension is visible.
	9 Action Check for the display of Commerce Case ID and Checkout ID. Data Expected Result Commerce Case ID and Checkout ID are displayed if they were created.
	10 Action Verify the display of Payment Execution ID. Data Expected Result Payment Execution ID is displayed as not available.
	11 Action Attempt to perform a capture action. Data Expected Result Capture action is not available.
	12 Action Attempt to perform a refund action.

Summary	Manual Test Steps	
		Data
		Expected Result Refund action is not available.
	13	Action Attempt to perform a cancel action.
		Data
		Expected Result Cancel action is not available.
	14	Action Check for a message indicating post-order actions availability.
		Data
		Expected Result Message indicates that post-order actions are not available until a payment execution exists.
	15	Action Verify that PAYONE transaction summary and status are displayed correctly.
		Data
		Expected Result PAYONE transaction summary and status are displayed correctly.
	16	Action Attempt to perform item-level capture and refund operations.
		Data
		Expected Result Item-level capture and refund operations are not available.
	17	Action Attempt to perform order-level capture and refund operations.

Summary	Manual Test Steps	
		Data
		Expected Result Order-level capture and refund operations are not available.
	18	Action Attempt to perform an authorization cancel operation.
		Data
		Expected Result Authorization cancel operation is not available.
	19	Action Validate behavior with invalid quantities, amounts, and cancel reasons.
		Data
		Expected Result System prevents actions with invalid quantities, amounts, and cancel reasons.
	20	Action Verify correct behavior when order-level discounts are present.
		Data
		Expected Result System behaves correctly with order-level discounts.
	21	Action Ensure PAYONE payment initiation is not possible from Customer Service Center.
		Data
		Expected Result PAYONE payment initiation is prevented from Customer Service Center.
	22	Action

Summary	Manual Test Steps	
		Ensure PAYONE payment initiation is not possible during on-behalf checkout.
		Data
		Expected Result
		PAYONE payment initiation is prevented during on-behalf checkout.
PAYONE - Customer Service Center - Transaction Summary - PAYONE Order Summary	1	Action Log in to Salesforce Commerce Cloud Business Manager.
		Data
		Expected Result Successfully logged in to the Business Manager.

		Data
		Expected Result PAYONE CSC extension is visible and accessible.
	4	Action Search for a PAYONE order with a payment execution.
		Data
		Expected Result PAYONE order with payment execution is found.
	5	Action
		Open the order details page for the selected PAYONE order.

Summary	Manual Test Steps	
		Data
		Expected Result Order details page is displayed.
	6	Action Compare the displayed SFCC order number with the order number in the PAYONE Commerce Portal.
		Data
		Expected Result SFCC order number matches the order number in the PAYONE Commerce Portal.
	7	Action Verify the payment method displayed in the summary.
		Data
		Expected Result Payment method is correctly displayed.
	8	Action Check for the presence of PAYONE checkout reference in the summary.
		Data
		Expected Result PAYONE checkout reference is displayed.
	9	Action Verify the Commerce Case ID in the summary.
		Data
		Expected Result Commerce Case ID is displayed correctly.
	10	Action Check for the Checkout ID in the summary.

Summary	Manual Test Steps	
		Data
		Expected Result Checkout ID is displayed correctly.
	11	Action Verify the Payment Execution ID in the summary.
		Data
		Expected Result Payment Execution ID is displayed correctly.
	12	Action Check the checkout status displayed in the summary.
		Data
		Expected Result Checkout status is displayed correctly.
	13	Action Verify the payment status in the summary.
		Data
		Expected Result Payment status is displayed correctly.
	14	Action Check the last event and last event date in the summary.
		Data
		Expected Result Last event and last event date are displayed correctly.
	15	Action Verify the allowed payment actions listed in the summary.
		Data
		Expected Result

Summary	Manual Test Steps
	Allowed payment actions are displayed correctly.
	16 Action Check the amount summaries in the summary.
	Data
	Expected Result Amount summaries are displayed correctly.
	17 Action Perform an item-level capture operation.
	Data
	Expected Result Item-level capture operation is successful.
	18 Action Perform an item-level refund operation.
	Data
	Expected Result Item-level refund operation is successful.
	19 Action Perform an order-level capture operation.
	Data
	Expected Result Order-level capture operation is successful.
	20 Action Perform an order-level refund operation.
	Data
	Expected Result Order-level refund operation is successful.
	21 Action

Summary	Manual Test Steps	
		Data
		Expected Result The order details page is displayed.
	4	Action Click on the `More` button at the top right of the CSC order details page.
		Data
		Expected Result A dropdown menu is displayed.
	5	Action Select the `PAYONE` option from the dropdown menu.
		Data
		Expected Result PAYONE CSC extension opens.
	6	Action Verify that the PAYONE transaction summary and status are displayed correctly.
		Data
		Expected Result PAYONE summary data is shown correctly for PAYONE orders.
	7	Action Ensure that unsupported post-order actions are not exposed for non-PAYONE and checkout-only PAYONE orders.
		Data
		Expected Result Unsupported actions are not visible.
	8	Action

Summary	Manual Test Steps
	Select the capture checkbox for a product row with an ordered quantity greater than `1`. Data Expected Result The product row is selected for capture.
	9 Action Enter quantity `1` for the selected product row. Data Expected Result Quantity `1` is entered.
	10 Action Click `Capture Selected Items`. Data Expected Result Capture action is initiated.
	11 Action Verify the action result in the PAYONE CSC sidebar. Data Expected Result The action is completed successfully.
	12 Action Check that the selected product row's captured quantity increases by `1`. Data Expected Result Captured quantity increases by `1`.
	13 Action

Summary	Manual Test Steps
	Check that the selected product row's capturable quantity decreases by `1`.
	Data
	Expected Result Capturable quantity decreases by `1`.
	14 Action Verify that the selected product row becomes refundable for the captured quantity when the PAYONE state allows refunds.
	Data
	Expected Result The product row is refundable for the captured quantity.
	15 Action Log in to the PAYONE Commerce Portal.
	Data
	Expected Result Successfully logged in to the PAYONE Commerce Portal.
	16 Action Navigate to the transaction history section.
	Data
	Expected Result Transaction history is displayed.
	17 Action Verify that PAYONE shows a capture event for the selected amount.
	Data
	Expected Result Capture event is recorded for the selected amount.
	18 Action
