

PAYONE

SFRA Checkout

Summary	Manual Test Steps
PAYONE - PayPal - Changing shipping address from the PayPal window	1 Action Prepare both shopper types: one guest checkout session and one logged-in storefront customer with a customer profile and saved address-book support available. Use a basket in `EUR`.
	Data
	Expected Result Both shopper types are prepared for testing with a basket in `EUR`.
	2 Action Ensure site preferences and credentials are configured in the test environment, especially PAYONE merchant setup, PayPal merchant ID, Google Pay merchant setup, and SEPA creditor ID.
	Data
	Expected Result Test environment is configured with the necessary site preferences and credentials.
	3 Action Use PAYONE test data where applicable.
	Data
	Expected Result PAYONE test data is used for testing.
	4 Action Add a product to the basket and go to checkout.
	Data
	Expected Result Product is added to the basket and checkout page is reached.
	5 Action Fill shipping and billing data.

Summary	Manual Test Steps	
		Data
		Expected Result Shipping and billing data are filled correctly.
	6	Action Select ` Payone Commerce PayPal` .
		Data
		Expected Result ` Payone Commerce PayPal` is selected as the payment method.
	7	Action Click the PayPal button.
		Data
		Expected Result PayPal window is displayed.
	8	Action From the window displayed, click on the "Change" button to change the shipping address.
		Data
		Expected Result A warning message is displayed in the PayPal Window: "This is the address provided by PAYONE Qualitätssicherung's Test Store. You can change it on the PAYONE Qualitätssicherung's Test Store site."
	9	Action Complete the PayPal approval process.
	Data	
	Expected Result	

Summary	Manual Test Steps
	Storefront auto-continues through payment submission and place order. No extra manual click on the native SFRA checkout button is required after approval.
	10 Action Verify the shopper reaches order confirmation.
	Data
	Expected Result Shopper reaches confirmation.
	11 Action Verify the order exists in Business Manager and is not failed.
	Data
	Expected Result BM order exists and is not failed.
	12 Action Check the PAYONE portal for a successful PayPal SDK flow.
	Data
	Expected Result PAYONE portal shows a successful PayPal SDK flow.
PAYONE - Secured Installment - Secured Installment Legal Text	1 Action Log in to the e-commerce platform as a logged-in user.
	Data User credentials
	Expected Result User is successfully logged in and redirected to the homepage.
	2 Action Add items to the shopping cart with a total value in EUR.
	Data

Summary	Manual Test Steps
	Expected Result Items are successfully added to the cart with the total displayed in EUR.
	3 Action Proceed to checkout.
	Data
	Expected Result User is redirected to the checkout page.
	4 Action Enter a German or Austrian address for both billing and shipping.
	Data
	Expected Result Address fields are filled with valid German or Austrian data.
	5 Action Select the Secured Installment payment option.
	Data
	Expected Result Secured Installment option is selected.
	6 Action Check the area below the payment fields
	Data
	Expected Result - If slot content is configured for `payone-secure-terms`, it is rendered. - If the slot is not configured, empty space alone is not a defect.
	7 Action

Summary	Manual Test Steps
	Click on `Next` to load installment options from PAYONE.
	Data
	Expected Result Installment options are loaded and displayed.
	8 Action Select an installment option and click `Next` again.
	Data
	Expected Result User proceeds to the next step of the checkout process.
	9 Action Complete the checkout process.
	Data
	Expected Result Order is successfully placed, and the user is redirected to the order confirmation page.
	10 Action Verify the order confirmation page displays the correct order details.
	Data
	Expected Result Order confirmation page shows correct order details and payment method.
	11 Action Log in to the Business Manager and navigate to the Orders section.
	Data
	Expected Result Business Manager Orders section is accessed.

Summary	Manual Test Steps
	12 Action Verify the order exists in the Business Manager. Data Expected Result Order is present in the Business Manager with the correct details.
	13 Action Open the PAYONE Portal and navigate to the Checkouts section. Data Expected Result PAYONE Portal Checkouts section is accessed.
	14 Action Use the PAYONE Checkout Reference from Business Manager to find the checkout. Data Expected Result Matching checkout is found in the PAYONE Portal.
	15 Action Open the checkout entry and navigate to the Payments tab. Data Expected Result Payments tab is accessed, showing payment execution details.
	16 Action Repeat steps 1-18 as a guest user. Data Expected Result

Summary	Manual Test Steps	
		Guest user completes the checkout process without relying on saved addresses or profiles.
PAYONE - Secured Installment - Secured Installment basket or checkout change after options load for Logged-In and Guest Users	1	Action Open the storefront and navigate to the checkout page.
		Data
		Expected Result The checkout page is displayed.
	2	Action Select a German or Austrian address for shipping and billing.
		Data
		Expected Result The address fields are populated with German or Austrian data.
	3	Action Ensure the currency is set to EUR.
		Data
		Expected Result The currency is confirmed as EUR.
	4	Action Proceed to the payment step in the checkout process.
		Data
		Expected Result The payment options are displayed.
	5	Action Select the Secured Installment payment method.
		Data
		Expected Result Secured Installment options are displayed.

Summary	Manual Test Steps
	6 Action Click 'Next' to load installment options from PAYONE. Data Expected Result Installment options are successfully loaded.
	7 Action Select one of the available installment options. Data Expected Result The selected installment option is highlighted.
	8 Action Open a new tab and change the basket quantity or total. Data Expected Result The basket quantity or total is updated.
	9 Action Return to the original checkout tab. Data Expected Result The checkout page is still open with the previous installment selection.
	10 Action Attempt to proceed with the old installment option selection. Data Expected Result The old selection is not accepted; an error prompts to reload options.

Summary	Manual Test Steps
	11 Action Reload the installment options by clicking 'Next' again. Data Expected Result Fresh installment options are loaded.
	12 Action Select a new installment option from the refreshed list. Data Expected Result The new installment option is selected.
	13 Action Complete the checkout process by clicking 'Next' again. Data Expected Result The order is successfully placed, and order confirmation is displayed.
	14 Action Log in to Business Manager and navigate to the Orders section. Data Expected Result The Orders section is displayed.
	15 Action Verify the order exists with the expected PAYONE payment method. Data Expected Result The order is listed with the correct payment method.

Summary	Manual Test Steps
	16 Action Check the order's Payment tab for PAYONE Commerce Case ID, Checkout ID, and Checkout Reference. Data Expected Result All PAYONE identifiers are correctly stored.
	17 Action Verify PAYONE Payment Execution ID and Payment Status are stored. Data Expected Result The execution ID and status are present for the order.
	18 Action Open the PAYONE Portal and navigate to the Checkouts section. Data Expected Result The Checkouts section is displayed.
	19 Action Use the PAYONE Checkout Reference from Business Manager to find the checkout. Data Expected Result The correct checkout entry is located.
	20 Action Open the checkout details and navigate to the Payments tab. Data Expected Result

Summary	Manual Test Steps		
		The Payments tab is displayed with payment details.	
	21	Action	Verify the payment row shows a successful payment flow.
		Data	
		Expected Result The payment status is successful, matching the order placement.	
	22	Action	For a guest user, repeat steps 1-21 without relying on saved addresses or profiles.
		Data	
		Expected Result The flow works correctly for a guest user, with no reliance on saved data.	
PAYONE - Secured Installment - Secured Installment switch-away cancel behavior for Logged In and Guest Users	1	Action	Log in to the storefront as a registered user or proceed as a guest
		Data	
		Expected Result User is logged in or proceeds as a guest.	
	2	Action	Add items to the cart with a total in EUR currency
		Data	
		Expected Result Items are added to the cart with EUR as the currency.	
	3	Action Proceed to checkout	

Summary	Manual Test Steps	
		Data
		Expected Result Checkout page is displayed.
	4	Action Enter a German or Austrian address for both billing and shipping
		Data
		Expected Result Address fields are filled with German or Austrian data.
	5	Action Select Secured Installment as the payment method
		Data
		Expected Result Secured Installment payment method is selected.
	6	Action Click on 'Next' to load installment options from PAYONE
		Data
		Expected Result Installment options are loaded from PAYONE.
	7	Action Select an installment option
		Data
		Expected Result An installment option is selected.
	8	Action Click on 'Next' to proceed with the checkout
	Data	

Summary	Manual Test Steps
	Expected Result SFRA checkout continues, and PAYONE payment execution is completed.
	9 Action Switch to another payment method
	Data
	Expected Result Another payment method is selected.
	10 Action Switch back to Secured Installment
	Data
	Expected Result Secured Installment is re-selected.
	11 Action Verify that previously loaded installment options are no longer active
	Data
	Expected Result Previously loaded options are inactive.
	12 Action Load fresh installment options again
	Data
	Expected Result New installment options are loaded.
	13 Action Complete the checkout process
	Data

Summary	Manual Test Steps
	Expected Result Order confirmation page is displayed.
	14 Action Verify no SFCC order is created until the full flow is completed
	Data
	Expected Result No order is created until checkout is completed.
	15 Action Open Business Manager and verify the order exists
	Data
	Expected Result Order is present in Business Manager.
	16 Action Verify the selected payment method is the expected PAYONE method
	Data
	Expected Result Correct PAYONE method is selected.
	17 Action Check that the order is not failed for a success scenario
	Data
	Expected Result Order status is successful.
	18 Action In the BM order 'Payment' tab, verify 'PAYONE Commerce Case ID' is stored
	Data

Summary	Manual Test Steps
	Expected Result 'PAYONE Commerce Case ID' is present.
	19 Action Verify 'PAYONE Checkout ID' and 'PAYONE Checkout Reference' are stored
	Data
	Expected Result Both IDs are stored in the payment tab.
	20 Action Verify 'PAYONE Payment Execution ID' and 'PAYONE Payment Status' are stored
	Data
	Expected Result Execution ID and Payment Status are stored.
	21 Action Open 'Checkouts' in the PAYONE Portal
	Data
	Expected Result PAYONE Portal 'Checkouts' list is displayed.
	22 Action Use 'PAYONE Checkout Reference' from BM to find the matching checkout
	Data
	Expected Result Correct checkout is identified in PAYONE Portal.
	23 Action Open the checkout details and verify the 'Payments' tab
	Data

Summary	Manual Test Steps	
		Expected Result Payments tab shows expected payment row and status.
	24	Action For logged-in users, verify 'Customer Id' consistency across tests
		Data
		Expected Result 'Customer Id' is consistent for logged-in users.
	25	Action For guest users, do not treat changing 'Customer Id' as a defect
		Data
PAYONE - Secured Installment - Secured Installment no options returned or option-load failure for Logged In and Guest Users	1	Action Log in to the e-commerce platform as a logged-in user.
		Data
		User credentials
		Expected Result User is successfully logged in and redirected to the homepage.
	2	Action Add a product to the basket.
		Data
		Expected Result Product is successfully added to the basket.
	3	Action Proceed to checkout.
		Data

Summary	Manual Test Steps
	Expected Result User is redirected to the checkout page.
	4 Action Enter a German or Austrian address for both billing and shipping.
	Data Address details
	Expected Result Address is accepted and both billing and shipping addresses are identical.
	5 Action Ensure the basket currency is set to EUR.
	Data
	Expected Result Basket currency is confirmed as EUR.
	6 Action Click on `Next` to load installment options from PAYONE.
	Data
	Expected Result Attempt to load installment options is initiated.
	7 Action Observe the response for installment options.
	Data
	Expected Result No usable installment option list is visible.
	8 Action Verify that a checkout error is displayed instead of a selectable option list.

Summary	Manual Test Steps	
		Data
		Expected Result Checkout error is displayed to the shopper.
	9	Action Confirm that no order is created in the system.
		Data
		Expected Result No new order is present in the system.
	10	Action Check that no successful PAYONE payment result is created for this attempt.
		Data
		Expected Result No successful payment result is recorded in PAYONE.
	11	Action Log out from the e-commerce platform.
		Data
		Expected Result User is successfully logged out.
	12	Action Repeat steps 1-11 as a guest user.
		Data
		Expected Result Guest user completes the steps with the same expected results.
	13	Action Verify that the checkout prefill does not break PAYONE field handling for logged-in users.

Summary	Manual Test Steps	
		Data
		Expected Result PAYONE field handling remains intact.
	14	Action Verify redirect return flows finish correctly when the shopper is logged in.
		Data
		Expected Result Redirect return flows complete successfully.
	15	Action Check for any unexpected address-book side effects for card redirect flows.
		Data
		Expected Result No unexpected address-book side effects are observed.
	16	Action In PAYONE Portal, verify if `Customer Id` is stable for repeated orders by the same registered shopper.
		Data
		Expected Result `Customer Id` remains stable for repeated orders.
	17	Action Verify the full flow works without relying on saved addresses or customer profile data for guest users.
		Data
		Expected Result Flow completes successfully without saved data reliance.
	18	Action

Summary	Manual Test Steps
	In PAYONE Portal, confirm that `Customer Id` is not a stable identifier for guest test runs.
	Data
	Expected Result `Customer Id` is not stable for guest runs.
	19 Action For local validation-only failures, ensure no SFCC order is created.
	Data
	Expected Result No SFCC order is created for validation-only failures.
	20 Action For provider rejections during or after authorization, verify that a failed SFCC order can exist.
	Data
	Expected Result Failed SFCC order exists if rejection occurs during or after authorization.
	21 Action In Business Manager, verify no new order was created if no order is expected.
	Data
	Expected Result No new order is present in Business Manager.
	22 Action If PAYONE declines the payment after SFCC order creation, verify the order exists in failed status.
	Data

Summary	Manual Test Steps	
		Expected Result Order exists in failed status in Business Manager.
	23	Action Open `Checkouts` in the PAYONE Portal and verify the absence of a successful payment result for the attempt.
		Data
		Expected Result No successful payment result is present in PAYONE Portal.
PAYONE - Secured Installment - Secured Installment local validation failure before options load for Logged In and Guest Users	1	Action Log in to the e-commerce platform as a registered user.
		Data
		Expected Result User is successfully logged in.
	2	Action Add a product to the shopping basket.
		Data
		Expected Result Product is added to the basket.
	3	Action Proceed to checkout.
		Data
		Expected Result User is directed to the checkout page.
	4	Action Enter shipping and billing address using a German or Austrian address.
		Data

Summary	Manual Test Steps
	Expected Result Shipping and billing addresses are entered correctly.
	5 Action Ensure the billing and shipping addresses are identical.
	Data
	Expected Result Billing and shipping addresses match.
	6 Action Select the currency as EUR.
	Data
	Expected Result Currency is set to EUR.
	7 Action Select "Payone Commerce Secured Installment" as the payment method.
	Data
	Expected Result "Payone Commerce Secured Installment" is selected.
	8 Action Leave the IBAN, phone number, and date-of-birth fields empty.
	Data
	Expected Result Fields are left empty.
	9 Action Click "Next" to proceed.
	Data
	Expected Result

Summary	Manual Test Steps
	Required fields show validation errors.
	10 Action Verify that installment options are not loaded.
	Data
	Expected Result Installment options are not loaded.
	11 Action Ensure the checkout remains on the payment step.
	Data
	Expected Result Checkout stays on the payment step.
	12 Action Verify that no order is created in the system.
	Data
	Expected Result No order is created.
	13 Action Check the Business Manager for any new orders.
	Data
	Expected Result No new order is found in Business Manager.
	14 Action Verify that no successful PAYONE transaction is created.
	Data
	Expected Result No successful PAYONE transaction is recorded.
	15 Action

Summary	Manual Test Steps
	Log out from the e-commerce platform.
	Data
	Expected Result User is logged out.
	16 Action Repeat steps 1-15 as a guest user.
	Data
	Expected Result Guest user experiences the same validation errors and no order is created.
	17 Action Verify that the checkout prefill does not break PAYONE field handling for logged-in users.
	Data
	Expected Result PAYONE field handling is not broken.
	18 Action Check that redirect return flows finish correctly when the shopper is logged in.
	Data
	Expected Result Redirect return flows complete successfully.
	19 Action Ensure no unexpected address-book side effects occur for card redirect flows.
	Data
	Expected Result No unexpected address-book side effects are observed.

Summary	Manual Test Steps
	20 Action In the PAYONE Portal, verify that no checkout records are created for the test run. Data Expected Result No checkout records are found in the PAYONE Portal.
	21 Action Ensure that the PAYONE Portal does not show a successful payment row for the checkout attempt. Data Expected Result No successful payment row is displayed in the PAYONE Portal.
	1 Action Log in to the e-commerce platform as a registered user. Data Expected Result User is successfully logged in.
	2 Action Add a product to the basket. Data Expected Result Product is added to the basket.
	3 Action Proceed to checkout. Data Expected Result User is directed to the checkout page.
PAYONE - Secured Installment - Secured Installment success for Logged-In and Guest Users	

Summary	Manual Test Steps
	4 Action Enter shipping and billing address using a German or Austrian address.
	Data
	Expected Result Shipping and billing addresses are entered correctly.
	5 Action Ensure the billing and shipping addresses are identical.
	Data
	Expected Result Billing and shipping addresses match.
	6 Action Select 'Payone Commerce Secured Installment' as the payment method.
	Data
	Expected Result 'Payone Commerce Secured Installment' is selected.
	7 Action Enter IBAN, phone number, and date of birth.
	Data
	Expected Result IBAN, phone number, and date of birth are entered correctly.
	8 Action Click 'Next' to load installment options.
	Data
	Expected Result Installment options are loaded and displayed.

Summary	Manual Test Steps	
		Data
		Expected Result Access to Business Manager is granted.
	15	Action Verify that the order exists in Business Manager.
		Data
		Expected Result Order is present in Business Manager.
	16	Action Check that the selected payment method is 'Payone Commerce Secured Installment'.
		Data
		Expected Result Correct payment method is recorded.
	17	Action Ensure the order is not marked as failed.
		Data
		Expected Result Order status is not failed.
	18	Action In the BM order 'Payment' tab, verify 'PAYONE Commerce Case ID' is stored.
		Data
		Expected Result 'PAYONE Commerce Case ID' is present.
	19	Action Verify 'PAYONE Checkout ID' is stored in the BM order 'Payment' tab.

	11 Action

Summary	Manual Test Steps
	Ensure billing and shipping addresses are identical. Data Expected Result Billing and shipping addresses match.
	17 Action Select the Secured Installment payment method. Data Expected Result Secured Installment option is selected.
	18 Action Click 'Next' to load installment options from PAYONE. Data Expected Result Installment options are successfully loaded.
	19 Action Change a billing address field. Data Expected Result Field is changed.
	20 Action Observe the installment option block. Data Expected Result Previously loaded installment options are cleared.
	21 Action Click 'Next' again to reload installment options. Data

Summary	Manual Test Steps
	Expected Result Installment options are reloaded successfully.
	22 Action Complete the checkout process and confirm the order.
	Data
	Expected Result Order is successfully placed and order confirmation is displayed.
	23 Action Access Business Manager and verify the order exists.
	Data
	Expected Result Order is present in Business Manager.
	24 Action Verify the selected payment method is the expected PAYONE method.
	Data
	Expected Result Correct PAYONE method is recorded.
	25 Action Check the BM order 'Payment' tab for PAYONE Commerce Case ID, Checkout ID, and Checkout Reference.
	Data
	Expected Result All PAYONE identifiers are stored correctly.
	26 Action Open PAYONE Portal and navigate to 'Checkouts'.
	Data

Summary	Manual Test Steps	
		Expected Result PAYONE Portal 'Checkouts' list is displayed.
	27	Action Use the BM 'PAYONE Checkout Reference' to find the matching checkout.
		Data
		Expected Result Correct checkout is identified in PAYONE Portal.
	28	Action Open the checkout details and verify the 'Payments' tab for successful payment execution.
		Data
PAYONE - Secured Installment - Secured Installment Billing and Shipping Mismatch for Logged-In and Guest Users		Expected Result Payment execution is successful and matches the expected result.
	1	Action Open the e-commerce website and log in as a registered user.
		Data
		Expected Result User is successfully logged in.
	2	Action Add a product to the shopping basket.
		Data
		Expected Result Product is added to the basket.
	3	Action Proceed to checkout.

Summary	Manual Test Steps
	Data
	Expected Result Checkout page is displayed.
	4 Action Enter a German or Austrian address for both billing and shipping.
	Data
	Expected Result Address fields are filled with valid data.
	5 Action Ensure billing and shipping addresses are NOT identical.
	Data
	Expected Result Billing and shipping addresses DONT match.
	6 Action Select EUR as the currency for the basket.
	Data
	Expected Result Currency is set to EUR.
	7 Action Choose Secured Installment as the payment method.
	Data
	Expected Result Secured Installment option is selected.
	8 Action Click 'Next' to load installment options from PAYONE.
	Data

Summary	Manual Test Steps
	Expected Result Installment options are loaded.
	9 Action Select an installment option.
	Data
	Expected Result Installment option is selected.
	10 Action Click 'Next' to proceed with the checkout.
	Data
	Expected Result - Checkout does not continue successfully with mismatched billing and shipping addresses. - Shopper sees an address-mismatch or generic checkout error. - Installment options are not shown as a valid path to completion for that attempt. - No successful SFCC order is created from the mismatched-address attempt.
	•
	11 Action Complete the checkout process and confirm the order.
	Data
	Expected Result Order confirmation page is displayed.
	12 Action Log out from the account.
	Data
	Expected Result

Summary	Manual Test Steps
	User is logged out.
	13 Action Open the e-commerce website and proceed as a guest user.
	Data
	Expected Result Guest checkout is initiated.
	14 Action Add a product to the shopping basket.
	Data
	Expected Result Product is added to the basket.
	15 Action Proceed to checkout.
	Data
	Expected Result Checkout page is displayed.
	16 Action Enter a German or Austrian address for both billing and shipping.
	Data
	Expected Result Address fields are filled with valid data.
	17 Action Ensure billing and shipping addresses are NOT identical.
	Data
	Expected Result Billing and shipping addresses are not matching.

Data		Expected Result No successful payment result is present.												
	Expected Result Correct checkout entry is found or confirmed absent.																				
24	Action Verify that no successful final payment result is shown in the 'Payments' tab for the attempt.																				
	Data																				
	Expected Result No successful payment result is present.																				
PAYONE - Store Pay - Store Pay for Logged-In and Guest Users	<table> <tr> <td>1</td><td>Action Open the e-commerce website and navigate to the product catalog.</td></tr> <tr> <td></td><td>Data</td></tr> <tr> <td></td><td>Expected Result The product catalog is displayed.</td></tr> <tr> <td>2</td><td>Action Select a product and add it to the shopping basket.</td></tr> <tr> <td></td><td>Data</td></tr> <tr> <td></td><td>Expected Result The product is added to the basket.</td></tr> <tr> <td>3</td><td>Action Proceed to checkout.</td></tr> <tr> <td></td><td>Data</td></tr> <tr> <td></td><td>Expected Result The checkout page is displayed.</td></tr> <tr> <td>4</td><td>Action Fill in the shipping and billing address fields with a German or Austrian address.</td></tr> </table>	1	Action Open the e-commerce website and navigate to the product catalog.		Data		Expected Result The product catalog is displayed.	2	Action Select a product and add it to the shopping basket.		Data		Expected Result The product is added to the basket.	3	Action Proceed to checkout.		Data		Expected Result The checkout page is displayed.	4	Action Fill in the shipping and billing address fields with a German or Austrian address.
1	Action Open the e-commerce website and navigate to the product catalog.																				
	Data																				
	Expected Result The product catalog is displayed.																				
2	Action Select a product and add it to the shopping basket.																				
	Data																				
	Expected Result The product is added to the basket.																				
3	Action Proceed to checkout.																				
	Data																				
	Expected Result The checkout page is displayed.																				
4	Action Fill in the shipping and billing address fields with a German or Austrian address.																				

Summary	Manual Test Steps	
		Data
		Expected Result The shipping and billing address fields are populated with the provided data.
	5	Action Ensure the billing and shipping addresses are identical.
		Data
		Expected Result The billing and shipping addresses match.
	6	Action Select the currency as EUR.
		Data
		Expected Result The currency is set to EUR.
	7	Action Choose the `Payone Commerce Pay in store` payment method.
		Data
		Expected Result The `Payone Commerce Pay in store` payment method is selected.
	8	Action Open the Store Pay payment option.
		Data
		Expected Result The Store Pay payment option is opened.
	9	Action Check the payment option content area for slot content.

Summary	Manual Test Steps	
		Data
		Expected Result If slot content is configured for `payone-storepay`, it is rendered. If not, empty content alone is not a defect.
	10	Action Place the order.
		Data
		Expected Result The order is placed, and a payment is created.
	11	Action Verify that `Payone Commerce Secured Direct Debit` is available.
		Data
		Expected Result `Payone Commerce Secured Direct Debit` is available when the scenario data is valid.
	12	Action Check that `PAYONE Payment Execution ID` and `PAYONE Payment Status` are stored for Secured Direct Debit.
		Data
		Expected Result `PAYONE Payment Execution ID` and `PAYONE Payment Status` are stored.
	13	Action Log in as a registered user if testing as a logged-in shopper.
		Data
		Expected Result The user is logged in successfully.

Summary	Manual Test Steps
	14 Action Verify checkout prefill does not break PAYONE field handling. Data Expected Result PAYONE field handling is not broken by checkout prefill.
	15 Action Verify redirect return flows finish correctly when logged in. Data Expected Result Redirect return flows finish correctly.
	16 Action Check that no unexpected address-book side effects occur for card redirect flows. Data Expected Result No unexpected address-book side effects occur.
	17 Action Note whether `Customer Id` is stable for repeated orders by the same registered shopper in PAYONE Portal. Data Expected Result `Customer Id` is stable for repeated orders.
	18 Action Verify the full flow works without relying on saved addresses or customer profile data for guest shoppers. Data Expected Result

Summary	Manual Test Steps
	The full flow works without relying on saved addresses or customer profile data.
	19 Action Check that no SFCC order is created for local validation-only failures.
	Data
	Expected Result No SFCC order is created for local validation-only failures.
	20 Action Verify that a failed SFCC order can exist if provider rejections happen during or after authorization.
	Data
	Expected Result A failed SFCC order can exist if provider rejections occur during or after authorization.
	21 Action In Business Manager, verify the order exists if expected.
	Data
	Expected Result The order exists in Business Manager.
	22 Action Verify the selected payment method is the expected PAYONE method in Business Manager.
	Data
	Expected Result The selected payment method is the expected PAYONE method.
	23 Action

Summary	Manual Test Steps
	Verify `PAYONE Commerce Case ID`, `PAYONE Checkout ID`, and `PAYONE Checkout Reference` are stored in the BM order `Payment` tab.
	Data
	Expected Result `PAYONE Commerce Case ID`, `PAYONE Checkout ID`, and `PAYONE Checkout Reference` are stored.
	24 Action Verify `PAYONE Payment Execution ID` and `PAYONE Payment Status` stay empty for Store Pay in Business Manager.
	Data
	Expected Result `PAYONE Payment Execution ID` and `PAYONE Payment Status` stay empty.
	25 Action Use `PAYONE Checkout Reference` from Business Manager to find the matching checkout in PAYONE Portal.
	Data
	Expected Result The matching checkout is found in PAYONE Portal using `PAYONE Checkout Reference`.
	26 Action Open the `Checkouts` in the PAYONE Portal and verify the checkout details.
	Data
	Expected Result The checkout details are verified in the PAYONE Portal.
	27 Action

Summary	Manual Test Steps
	Verify the `Payments` tab in PAYONE Portal does not show a normal payment row for Store Pay.
	Data
	Expected Result The `Payments` tab does not show a normal payment row for Store Pay.
	28 Action Verify the checkout shows the expected payment row and result for a successful payment flow.
	Data
	Expected Result The checkout shows the expected payment row and result for a successful payment flow.
	29 Action Verify the payment row or event status shows a rejected or failed result for a rejection case.
	Data
	Expected Result The payment row or event status shows a rejected or failed result.
	30 Action Verify there is no successful final payment result shown in the `Payments` tab for abort or cancel attempts.
	Data
	Expected Result No successful final payment result is shown in the `Payments` tab for abort or cancel attempts.
PAYONE - SEPA Direct Debit - SEPA	1 Action Log in to the storefront as a registered user.

Summary	Manual Test Steps
rejection for Logged-In and Guest Users	Data
	Expected Result User is successfully logged in.
	2 Action Add a product to the basket.
	Data
	Expected Result Product is added to the basket.
	3 Action Proceed to checkout.
	Data
	Expected Result User is directed to the checkout page.
	4 Action Fill in the shipping and billing data using German or Austrian address.
	Data
	Expected Result Shipping and billing data are filled correctly.
	5 Action Select `Payone Commerce SEPA Direct Debit` as the payment method.
	Data
	Expected Result SEPA Direct Debit is selected as the payment method.
	6 Action Complete the SEPA form using negative test data from PAYONE.

Summary	Manual Test Steps	
		Data
		Expected Result SEPA form is completed with test data.
	7	Action Place the order.
		Data
		Expected Result Checkout ends with an error.
	8	Action Verify that a failed SFCC order exists in Business Manager.
		Data
		Expected Result A failed order is present in Business Manager.
	9	Action Check the `Payment` tab in the BM order for `PAYONE Commerce Case ID`, `PAYONE Checkout ID`, and `PAYONE Checkout Reference`.
		Data
		Expected Result All expected PAYONE IDs are stored in the `Payment` tab.
	10	Action Verify `PAYONE Payment Execution ID` and `PAYONE Payment Status` are stored for SEPA Direct Debit.
		Data
	Expected Result Both `PAYONE Payment Execution ID` and `PAYONE Payment Status` are stored.	
11	Action	

Summary	Manual Test Steps
	Open `Checkouts` in the PAYONE Portal. Data Expected Result PAYONE Portal `Checkouts` list is displayed.
	12 Action Use the `PAYONE Checkout Reference` from BM to find the matching checkout in PAYONE Portal. Data Expected Result Matching checkout is found using `PAYONE Checkout Reference`.
	13 Action Open the checkout entry and navigate to the `Payments` tab. Data Expected Result `Payments` tab is opened.
	14 Action Verify the payment row or event status shows a rejected or unsuccessful result. Data Expected Result Payment is shown as rejected or unsuccessful.
	15 Action Log out from the storefront. Data Expected Result User is logged out.

Summary	Manual Test Steps
	16 Action Proceed to checkout as a guest user. Data Expected Result User is directed to the checkout page as a guest.
	17 Action Repeat steps 2 to 6 for the guest user. Data Expected Result Steps are completed successfully for the guest user.
	18 Action Verify that the full flow works without relying on saved addresses or customer profile data. Data Expected Result Flow works independently of saved data.
	19 Action Check that no stable `Customer Id` is expected in PAYONE Portal for guest user. Data Expected Result `Customer Id` is not stable for guest user.
	20 Action Check the API response from PAYONE Portal for SEPA Direct Debit to ensure it is captured. Data Expected Result API response shows `CAPTURED` status for SEPA Direct Debit.

Summary	Manual Test Steps	
PAYONE - Credit Card - Card success with 3DS for Logged-In and Guest Users	1	Action Log in to the e-commerce platform as a registered user.
		Data
		Expected Result User is successfully logged in and redirected to the homepage.
	2	Action Add a product to the shopping basket.
		Data
		Expected Result Product is successfully added to the basket.
	3	Action Proceed to checkout.
		Data
		Expected Result User is redirected to the checkout page.
	4	Action Fill in the shipping and billing data with German or Austrian address details.
		Data
		Expected Result Shipping and billing information is successfully entered.
	5	Action Select "Payone Commerce Card" as the payment method.
		Data
		Expected Result "Payone Commerce Card" is selected as the payment method.
	6	Action

Summary	Manual Test Steps
	Fill the hosted card fields with successful 3DS test data. Data Expected Result Card details are successfully entered.
	7 Action Click "Next" to proceed. Data Expected Result User is taken to the next step of the checkout process.
	8 Action Complete the checkout process and place the order. Data Expected Result Order is successfully placed, and order confirmation is displayed.
	9 Action Repeat the card flow with 3DS test data. Data Expected Result 3DS card details are successfully entered.
	10 Action Click "Next" to proceed. Data Expected Result User is redirected to the 3DS authentication step.
	11 Action Complete the external 3DS challenge.

Summary	Manual Test Steps	
		Data
		Expected Result User successfully completes the 3DS challenge and is redirected back to the e-commerce platform.
	12	Action Verify that the order is finalized and confirmation is shown.
		Data
		Expected Result Order confirmation page is displayed, indicating successful order placement.
	13	Action Check Business Manager for the existence of the order.
		Data
		Expected Result Order exists in Business Manager and is not marked as failed.
	14	Action Verify the selected payment method in Business Manager.
		Data
		Expected Result The payment method is recorded as the expected PAYONE method.
	15	Action Check the "Payment" tab in Business Manager for PAYONE details.
		Data
		Expected Result PAYONE Commerce Case ID, Checkout ID, and Checkout Reference are stored.

Summary	Manual Test Steps
	16 Action Verify PAYONE Payment Execution ID and Payment Status for the order. Data Expected Result PAYONE Payment Execution ID and Payment Status are correctly stored.
	17 Action Open the PAYONE Portal and navigate to "Checkouts". Data Expected Result PAYONE Portal displays the list of checkouts.
	18 Action Use the PAYONE Checkout Reference from Business Manager to find the checkout. Data Expected Result The correct checkout entry is located in the PAYONE Portal.
	19 Action Open the checkout details and navigate to the "Payments" tab. Data Expected Result Payments tab displays payment execution details.
	20 Action Verify the payment row and event status in the PAYONE Portal. Data Expected Result

Action																					

Summary	Manual Test Steps
	Select the `Payone Commerce Card` payment method. Data Expected Result `Payone Commerce Card` is selected as the payment method.
	4 Action Fill the hosted card fields with successful non-3DS test data. Data Expected Result Card details are entered successfully.
	5 Action Click `Next`. Data Expected Result The checkout process advances to the next step.
	6 Action Continue checkout and place the order if the storefront does not auto-advance. Data Expected Result Order is placed successfully, and the shopper reaches the order confirmation page.
	7 Action Verify that the order exists in Business Manager. Data Expected Result The order is present in Business Manager.

Summary	Manual Test Steps
	8 Action Verify that the order is not marked as failed in Business Manager. Data Expected Result The order status is not failed.
	9 Action Check that the selected payment method is the expected PAYONE method in Business Manager. Data Expected Result The payment method is correctly recorded as PAYONE.
	10 Action Verify that `PAYONE Commerce Case ID` is stored in the BM order `Payment` tab. Data Expected Result `PAYONE Commerce Case ID` is present.
	11 Action Verify that `PAYONE Checkout ID` is stored in the BM order `Payment` tab. Data Expected Result `PAYONE Checkout ID` is present.
	12 Action Verify that `PAYONE Checkout Reference` is stored in the BM order `Payment` tab. Data

Summary	Manual Test Steps
	Expected Result `PAYONE Checkout Reference` is present.
	13 Action Verify that `PAYONE Payment Execution ID` and `PAYONE Payment Status` are stored for the card payment.
	Data
	Expected Result `PAYONE Payment Execution ID` and `PAYONE Payment Status` are present.
	14 Action Open `Checkouts` in the PAYONE Portal.
	Data
	Expected Result PAYONE Portal `Checkouts` list is displayed.
	15 Action Use the `PAYONE Checkout Reference` from Business Manager to find the matching checkout in PAYONE Portal.
	Data
	Expected Result The correct checkout entry is located.
	16 Action Open the newest matching checkout entry in PAYONE Portal.
	Data
	Expected Result Checkout details are displayed.
	17 Action Open the `Payments` tab in the checkout details.
	Data

Summary	Manual Test Steps		
		Expected Result ` Payments ` tab is displayed.	
	18	Action Verify that the payment row shows a successful card authorization flow.	
		Data	
		Expected Result Payment row indicates a successful authorization.	
	19	Action Verify that the visible result matches a successful payment flow for the card method.	
		Data	
		Expected Result Payment flow is confirmed as successful.	
	20	Action Repet the steps for Logged in user	
		Data	
		Expected Result Payment flow is confirmed as successful.	
	21	Action Ensure that the ` Customer Id ` in PAYONE Portal is consistent for logged-in shopper scenarios.	
		Data	
		Expected Result ` Customer Id ` is consistent across tests for logged-in shoppers.	
	PAYONE - Secured Invoice - Secured	1	Action Log in to the e-commerce platform as a logged-in user.

Summary	Manual Test Steps	
Invoice local validation failure for Logged-In and Guest Users		Data
		Expected Result User is successfully logged in.
	2	Action Add a product to the basket.
		Data
		Expected Result Product is successfully added to the basket.
	3	Action Proceed to checkout.
		Data
		Expected Result User is directed to the checkout page.
	4	Action Fill in the shipping and billing address with a German or Austrian address.
		Data
		Expected Result Shipping and billing address fields are populated with the correct data.
	5	Action Ensure the billing and shipping addresses are identical.
		Data
		Expected Result Billing and shipping addresses match.
	6	Action Select the currency as EUR.

Summary	Manual Test Steps	
		Data
		Expected Result Currency is set to EUR.
	7	Action Select "Payone Commerce Secured Invoice" as the payment method.
		Data
		Expected Result "Payone Commerce Secured Invoice" is selected.
	8	Action Leave the phone numbers and date-of-birth fields empty.
		Data
		Expected Result Phone numbers and date-of-birth fields are left empty.
	9	Action Click "Next" to proceed.
		Data
		Expected Result Required fields show validation errors, and checkout remains on the payment step.
	10	Action Verify that no order is created in the system.
		Data
		Expected Result No order is created.
11	Action Verify that no PAYONE transaction is created.	

Summary	Manual Test Steps	
		Data
		Expected Result No PAYONE transaction is created.
	12	Action Log out from the e-commerce platform.
		Data
		Expected Result User is successfully logged out.
	13	Action Log in to the e-commerce platform as a guest user.
		Data
		Expected Result User is browsing as a guest.
	14	Action Repeat steps 2 to 9 for the guest user.
		Data
		Expected Result Validation errors are shown, and no order or PAYONE transaction is created.
	15	Action Verify that the checkout prefill does not break PAYONE field handling for logged-in users.
		Data
		Expected Result PAYONE field handling is not broken.
	16	Action Verify redirect return flows finish correctly when the shopper is logged in.

Summary	Manual Test Steps	
		Data
		Expected Result Redirect return flows complete successfully.
	17	Action Verify no unexpected address-book side effects occur for card redirect flows.
		Data
		Expected Result No unexpected address-book side effects occur.
	18	Action Check in the PAYONE Portal if the `Customer Id` is stable for repeated orders by the same registered shopper.
		Data
		Expected Result `Customer Id` is stable for repeated orders.
	19	Action Verify the full flow works without relying on saved addresses, customer profile data, or account-only fields for guest users.
		Data
		Expected Result Flow works without relying on saved data.
	20	Action In PAYONE Portal, verify the `Checkouts` list for any entries related to the test run.
		Data
		Expected Result No entries related to the test run are found.
	21	Action

Summary	Manual Test Steps
	Verify that the PAYONE Portal `Checkouts` list is matched by the checkout merchant reference. Data Expected Result PAYONE Portal `Checkouts` list is correctly matched by the checkout merchant reference.
	22 Action Open the newest matching checkout entry in the PAYONE Portal and verify the `Payments` tab. Data Expected Result No successful final payment result is shown in the `Payments` tab for the attempt.
PAYONE - PayPal - PayPal state approval after basket or checkout change for Logged-In and Guest Users	1 Action Log in to the storefront as a registered user. Data User credentials Expected Result User is logged in successfully.
	2 Action Add a product to the basket. Data Expected Result Product is added to the basket successfully.

		Data	
		Expected Result	Shipping and billing data are filled correctly.
	5	Action	Select "Payone Commerce PayPal" as the payment method.
		Data	
		Expected Result	

Summary	Manual Test Steps
	Payone Commerce PayPal is selected as the payment method.
	6 Action Click the PayPal button to initiate the payment process.
	Data
	Expected Result PayPal popup opens.
	7 Action Cancel the PayPal payment in the PayPal popup.
	Data
	Expected Result PayPal popup closes, and the user is returned to the checkout page.
	8 Action Click the PayPal button again to retry the payment.
	Data
	Expected Result PayPal popup opens again.
	9 Action Cancel the PayPal payment in the PayPal popup again.
	Data
	Expected Result PayPal popup closes, and the user is returned to the checkout page.
	10 Action Click the PayPal button for the third time to retry the payment.
	Data
	Expected Result

Summary	Manual Test Steps
	PayPal popup opens again.
	11 Action Complete the PayPal payment successfully.
	Data
	Expected Result Payment is approved, and the user is redirected to the order confirmation page.
	12 Action Verify that the order confirmation page is displayed.
	Data
	Expected Result Order confirmation page is displayed, indicating a successful order.
	13 Action Log in to the Business Manager.
	Data
	Expected Result User is logged in to the Business Manager successfully.
	14 Action Navigate to the Orders section in the Business Manager.
	Data
	Expected Result Orders section is displayed.
	15 Action Verify that the order exists in the Business Manager.
	Data
	Expected Result

Summary	Manual Test Steps
	Order is present in the Business Manager.
	16 Action Check that the selected payment method is "Payone Commerce PayPal".
	Data
	Expected Result Payment method is correctly listed as "Payone Commerce PayPal".
	17 Action Verify that the order is not marked as failed.
	Data
	Expected Result Order status is not failed.
	18 Action In the BM order "Payment" tab, verify that "PAYONE Commerce Case ID" is stored.
	Data
	Expected Result "PAYONE Commerce Case ID" is present.
	19 Action Verify that "PAYONE Checkout ID" is stored in the BM order "Payment" tab.
	Data
	Expected Result "PAYONE Checkout ID" is present.
	20 Action Verify that "PAYONE Checkout Reference" is stored in the BM order "Payment" tab.

Summary	Manual Test Steps	
		Data
		Expected Result "PAYONE Checkout Reference" is present.
	21	Action Log in to the PAYONE Portal.
		Data
		Expected Result User is logged in to the PAYONE Portal successfully.
	22	Action Open the "Checkouts" section in the PAYONE Portal.
		Data
		Expected Result "Checkouts" section is displayed.
	23	Action Use the "PAYONE Checkout Reference" from the Business Manager to find the matching checkout in the PAYONE Portal.
		Data
		Expected Result Matching checkout is found using the "PAYONE Checkout Reference".
	24	Action Open the checkout details and navigate to the "Payments" tab.
		Data
		Expected Result "Payments" tab is displayed.
	25	Action Verify that the payment row shows a successful payment flow for the method.

Summary	Manual Test Steps				
		<table><tr><td>Data</td></tr><tr><td>Expected Result</td></tr><tr><td>Payment row indicates a successful payment.</td></tr></table>	Data	Expected Result	Payment row indicates a successful payment.
Data					
Expected Result					
Payment row indicates a successful payment.

		Data
		Expected Result Shipping and billing data are filled correctly.
	4	Action Select `Payone Commerce PayPal` as the payment method.
		Data
		Expected Result Payone Commerce PayPal is selected as the payment method.
	5	Action Click the PayPal button.
		Data

Summary	Manual Test Steps
	Expected Result PayPal popup is displayed for payment approval.
	6 Action Approve the payment in the PayPal popup.
	Data
	Expected Result Payment is approved successfully.
	7 Action Verify that the storefront auto-continues through payment submission and order placement.
	Data
	Expected Result Storefront proceeds automatically without additional clicks.
	8 Action Confirm that the shopper reaches the order confirmation page.
	Data
	Expected Result Order confirmation page is displayed.
	9 Action Log in to Business Manager and verify the order exists.
	Data
	Expected Result Order is present in Business Manager.
	10 Action Check that the order is not marked as failed.
	Data
	Expected Result

Summary	Manual Test Steps
	Order status is not failed.
	11 Action Verify that the selected payment method is the expected PAYONE method.
	Data
	Expected Result PAYONE method is correctly recorded.
	12 Action In the BM order `Payment` tab, verify `PAYONE Commerce Case ID` is stored.
	Data
	Expected Result PAYONE Commerce Case ID is present.
	13 Action Verify `PAYONE Checkout ID` is stored in the BM order `Payment` tab.
	Data
	Expected Result PAYONE Checkout ID is present.
	14 Action Verify `PAYONE Checkout Reference` is stored in the BM order `Payment` tab.
	Data
	Expected Result PAYONE Checkout Reference is present.
	15 Action For applicable payment methods, verify `PAYONE Payment Execution ID` and `PAYONE Payment Status` are stored.

Summary	Manual Test Steps	
		Data
		Expected Result PAYONE Payment Execution ID and Status are present.
	16	Action Open the PAYONE Portal and navigate to `Checkouts`.
		Data
		Expected Result PAYONE Portal `Checkouts` list is displayed.
	17	Action Use the `PAYONE Checkout Reference` from BM to find the matching checkout in PAYONE Portal.
		Data
		Expected Result Matching checkout is found using the reference.
	18	Action Open the checkout entry and navigate to the `Payments` tab.
		Data
		Expected Result Payments tab is displayed with payment details.
	19	Action Verify the checkout shows the expected payment row and successful payment flow.
		Data
		Expected Result Payment row indicates a successful flow.
	20	Action For logged-in users, note if the portal `Customer Id` is consistent across tests.

Summary	Manual Test Steps		
		Data	
		Expected Result	Customer Id is consistent for logged-in users.
	21	Action	For guest users, ensure the full flow works without relying on saved addresses or profiles.
		Data	
		Expected Result	Flow completes successfully without saved data reliance.
	22	Action	Verify no unexpected address-book side effects occur for logged-in users.
		Data	
		Expected Result	No unexpected address-book changes are observed.
	23	Action	Ensure that for local validation-only failures, no SFCC order is created.
		Data	
		Expected Result	No order is created for validation-only failures.
PAYONE - Store Pay - Store Pay success for logged-in and guest users	1	Action	Open the e-commerce website and log in as a registered user.
		Data	
		Expected Result	User is successfully logged in.
	2	Action
